Career Objectives

- Used PHP / MySQL in XAMPP environment for creating dynamic data-driven and interactive web pages.
- Migration and seeding of database schema based on the models for the application.
- Identifying and solving issues caused by plugins or feeds under PHP, MySQL, HTML, CSS, Javascript and JQuery technology.
- Creating a new feature, functionality, and capabilities on e-commerce sites using AJAX, JSON, Javascript.
- Recommending solutions for streamlined, user-friendly interface with the design team.
- Performing bug fixes and code reviews.
- Building stable and maintainable code bases using angular.
- Collaborating with designers to ensure designs were efficient and technically sound.
- Understanding restful services and APIs to communicate with a web service.
- Extensive database management experience to improve and streamline data storage and establish new security protocol.
- Time management required to meet strict deadlines for a website relaunch.
- Coded user applications that converted raw data from design engine to easily understandable graphical formats.
- Improvement of system architecture by refactoring old legacy code to the latest technology.
- Critical thinker to find creative solutions to complicated and subtle software and coding issues.

Projects

Skillshub

- **Description:** Skill assessment web site that tests your skills by MCQ exams then adds the result to your profile.
- **Technologies:** HTML5, CSS3, PHP, MYSQL, Laravel framework.

Coursegator

- **Description:** The project provides face-to-face classroom training to students from all over the world. It includes all training-related services like focusing in detail with all course categories and its description.
- **Technologies:** HTML5, CSS3, PHP, MYSQL.

E-Commerce Shopping Cart Development

- **Description:** : Is a project target to be an online shopping website that looks attractive, offers the buyers easy payments, and takes care of security concerns.
- **Technologies:** Angular9, Javascript, JQuery, Firebase.

Recipe-Book

- **Description:** Application that lets the customer choose all the items he want and update it in the system using all Angular features.
- **Technologies:** HTML5, CSS3, Javascript, JQuery, Bootstrap, Angular2, Firebase.

Stores Management System

- **Description:** Application that helps to streamline the store process with respect to Stock coming in, Stock Tracking, Invoice Generation, Stock Out, Payment collection tracking, all together providing end to end solution.
